

Caught the Fever: A Thrilling Account of the First Wave

In the early days of 2020, as the COVID-19 pandemic began to sweep across the globe, New York City became the epicenter of the storm. Hospitals were overwhelmed, healthcare workers were pushed to their limits, and the city's streets were eerily empty.

Caught the Fever is a gripping and unforgettable account of those early days, as told by award-winning journalist Jennifer Miller. Through the eyes of doctors, nurses, patients, and survivors, Miller chronicles the unfolding chaos and heartbreak of the first wave, while also highlighting the resilience and courage of those who fought tirelessly against the unknown.

Miller's reporting is both deeply personal and meticulously researched. She spent countless hours interviewing those who were on the front lines of the

pandemic, from the doctors and nurses who risked their own lives to save others, to the patients who fought desperately for their own survival.

The result is a book that is both a powerful indictment of the failures of our healthcare system and a testament to the indomitable spirit of the human race. *Caught the Fever* is an essential read for anyone who wants to understand the true cost of the COVID-19 pandemic, and the lessons we must learn from it.
