

# How The Left's Draconian Rules Are Eating Their Own

The Left has long been known for its draconian rules and regulations. But what happens when those rules start to eat their own?

That's exactly what's happening in the United States today. The Left's draconian rules on immigration, healthcare, and education are all backfiring, and the victims are often the very people the Left claims to care about.

## LIBERAL CANNIBALISM: How the Left's Draconian Rules Are Eating Their Own by Andrew McAfee

For example, the Left's support for open bFree Downloads has led to a surge in illegal immigration. This has put a strain on the nation's resources and has made it harder for legal immigrants to find work.

The Left's support for single-payer healthcare has led to long wait times for medical care. This has made it harder for people to get the care they need,

and has even led to some people dying while waiting for treatment.

The Left's support for Common Core education standards has led to a decline in educational standards. This has made it harder for children to learn, and has even led to some children dropping out of school.

These are just a few examples of how the Left's draconian rules are eating their own. The Left needs to wake up and realize that their rules are not helping anyone. They need to start listening to the people they claim to care about, and they need to start putting their needs first.

### **The Left's Draconian Rules on Immigration**

The Left has long been a supporter of open bFree Downloads. They argue that everyone should be able to come to the United States, regardless of their immigration status.

However, this policy has had a number of negative consequences. For example, it has led to a surge in illegal immigration. In 2017, there were an estimated 11 million illegal immigrants living in the United States.

This surge in illegal immigration has put a strain on the nation's resources. For example, it has led to overcrowding in schools and hospitals. It has also made it harder for legal immigrants to find work.

In addition, the Left's support for open bFree Downloads has led to an increase in crime. For example, a study by the Center for Immigration Studies found that illegal immigrants are more likely to commit crimes than native-born Americans.

The Left needs to wake up and realize that their open bFree Downloads policy is not working. It is leading to a number of negative consequences, including a surge in illegal immigration, a strain on the nation's resources, and an increase in crime.

## **The Left's Draconian Rules on Healthcare**

The Left has long been a supporter of single-payer healthcare. They argue that everyone should have access to affordable healthcare, regardless of their ability to pay.

However, this policy has had a number of negative consequences. For example, it has led to long wait times for medical care. In 2017, the average wait time for a doctor's appointment was 20 days.

These long wait times have made it harder for people to get the care they need. In some cases, they have even led to people dying while waiting for treatment.

In addition, the Left's support for single-payer healthcare has led to higher healthcare costs. For example, a study by the Kaiser Family Foundation found that single-payer healthcare would cost the government an additional \$2.3 trillion per year.

The Left needs to wake up and realize that their single-payer healthcare policy is not working. It is leading to long wait times for medical care, higher healthcare costs, and even death.

## **The Left's Draconian Rules on Education**

The Left has long been a supporter of Common Core education standards. They argue that these standards will help to improve education in the United States.

However, these standards have had a number of negative consequences. For example, they have led to a decline in educational standards. A study by the National Assessment of Educational Progress found that student achievement has declined since the implementation of Common Core.

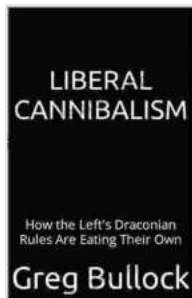

This decline in educational standards has made it harder for children to learn. In some cases, it has even led to children dropping out of school.

In addition, the Left's support for Common Core has led to an increase in teacher workload. Teachers are now required to spend more time on lesson planning and grading. This has made it harder for them to focus on teaching.

The Left needs to wake up and realize that their Common Core education standards are not working. They are leading to a decline in educational standards, an increase in teacher workload, and even children dropping out of school.

The Left's draconian rules are eating their own. These rules are leading to a number of negative consequences, including a surge in illegal immigration, a strain on the nation's resources, an increase in crime, long wait times for medical care, higher healthcare costs, a decline in educational standards, an increase in teacher workload, and even children dropping out of school.

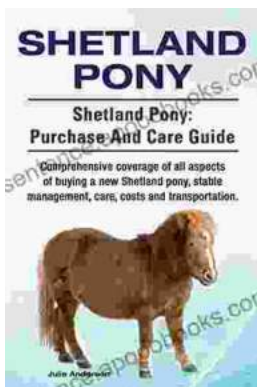

The Left needs to wake up and realize that their rules are not working. They need to start listening to the people they claim to care about, and they need to start putting their needs first.
